

Details & Contents

Description

The Bloodborne Pathogen/Bodily Fluid Spill Clean Up Kit provides a safe and quick clean up solution for messy situations. The OSHA compliant kit helps you maintain a safety barrier with the Personal Protection Equipment (PPE), while also allowing you to safely work with, clean up and dispose of blood or bodily fluids. Providing for the proper handling of blood borne pathogen (BBP) or bodily fluid incidents should be part of a full safety protocol in offices, warehouses, sporting venues and retail businesses.
